Susanne Hansen

Senior Executive Assistant
Carrollton, Texas (Dallas–Fort Worth) · susanne.hansen.sr.ea@gmail.com

SUMMARY

Senior executive assistant with seven years as strategic partner to senior executives in large multi-site organizations. Owns the operational layer around an executive: high-volume calendars, global travel planned around risk and security, meeting preparation, and action items tracked to completion. Builds the structure an executive office runs on: led an executive assistant team and rolled out the SOPs that put every new campus on one playbook. Runs a small team of AI agents in Claude, Grok, and ChatGPT for research, drafting, and testing, and checks their work before anything goes out. Clear and calm in ambiguity, from restructuring to new tools to competing deadlines, and comfortable keeping work moving without complete information. Passionate about autonomous transportation since about 2020; follows the space closely and drives an autonomous vehicle.

EXECUTIVE SUPPORT EXPERIENCE

Senior Executive Assistant · The Village Church, Flower Mound, Texas — January 2024 – December 2025

Hybrid. Strategic partner to the Executive Directors of Operations and of Engagement and Communications in a large multi-site organization.

- Owned the operational execution of two competing high-volume executive calendars as one integrated plan, protecting prep time before high-visibility meetings.
- Managed an executive inbox with a global audience: filtered and flagged, drafted replies and correspondence for signature, and surfaced only what needed the executive.
- Prepared meeting pre-reads, agendas and talking points; converted notes into executive summaries and tracked action items, owners and deadlines through completion.
- Proposed an AI adoption initiative after identifying a fluency and strategy gap; recommended technology and supported role-specific implementation as part of a three-person executive team.
- After a restructuring, worked as a de facto consultant: designed AI training workshops and role-specific workflows that helped the Communications team through 45% departmental turnover in four months.
- Supported budget preparation for phases 2–4 of a multi-year, multi-campus construction buildout; coordinated vendor, architect, and construction meetings and planned executive retreats.

Senior Executive Assistant · Bent Tree Church, Carrollton, Texas — January 2013 – May 2018

Large multi-site church. High-touch executive and personal support for a senior executive with a local and international speaking schedule.

- Led the executive assistant team and other initiatives and projects, taking work from research through training and implementation.
- Owned end-to-end calendar, speaking engagements, events, and domestic and international travel logistics at high complexity.
- Mitigated travel risk and security issues for the executive's global travel and speaking engagements.
- Served as gatekeeper and trusted liaison between the executive and staff, guests, donors, and public-relations contacts, screening requests and declining what did not belong on the calendar.
- Helped plan a multi-campus expansion on the strategic team; led communications and SOP implementation to establish consistent operating practices across new campuses.
- Supported a $22 million fundraiser and chapel construction through donor relations and event management.

APPLIED AI

AI Operator · Independent Project January 2026 – Present

A self-directed year learning to put AI to work by running real projects with it, including a health-care product.

- Designs and operates a team of autonomous AI agents in Claude, ChatGPT, and Grok, each with a defined job and written ground rules, managed like staff; keeps learning newer tools, including Gemini.
- Created one decision list for everything awaiting review or approval: each item says what it is, where to find it, and exactly what's needed, so decisions don't stall or get lost.
- Built one shared knowledge base every AI agent works from, whichever company makes it, so the work never depends on a single provider; confidential information is kept out by rule.
- Requires every AI draft to trace back to confirmed facts, and reviews it before anything is sent.
- Stopped an AI content project when its quality fell short, rather than publish work below standard.
- Took a support product for family caregivers from research through development with AI agents, which also handle getting it to market.

ADDITIONAL EXPERIENCE

Executive Ghostwriter · Independent Contractor January 2022 – December 2024

Fully remote. Strategic partner to clients including health-tech founders and ed-tech leaders.

- Shaped each principal's positioning and narrative, then wrote the thought leadership, presentations, and book chapters published under their name, in strict confidence.
- Worked as an extension of each principal, managing projects and client expectations in close collaboration with their product and technology teams.

Inflight Crew · American Airlines May 2018 – December 2022

A long-held goal, pursued between executive roles.

- Delivered calm, professional service on domestic and international routes, in regular and disrupted travel.
- Made safety-sensitive decisions on a constantly changing schedule, including when the operation broke down; knows from the inside where itineraries fail and how to plan around them.

EARLIER CAREER

Operations Manager (3+ years, 3 direct reports) · Financial Analyst, Arthur Andersen / Accenture · Statistical Forecasting and Analysis, Mary Kay Cosmetics
